# DIRECTOR'S NOTE

W.B. Yeats rightly observed, "Education is not the filling of a pail, but the lighting of a fire". We understand educational needs as those encompassing physical, social, intellectual and emotional development. To achieve these aspirations, we have developed a robust infrastructural base, comprehensive curriculum and technology-driven value-based delivery mechanism. There is a reliable connection between classroom learning and outdoor experiences; between parental role and that of the school; and between learning for now and learning for life.

We place a high premium on the role of teachers, their competencies, skills and ability to nurture talent.

When we look 6 months back , the journey we started this year , it feels overwhelming ... Not just for the distance we travelled but for the immense support we have had from everyone whom we met... Parents, teachers, children, family, friends, everyone showed so much faith in us all along, trusted us, allowed us to take all the risks and we took the risks because we were so sure of the support we had.

.Aristotle once said that "Educating the mind without educating the heart is not education". Even as we impart the education to match the advancement in technology and processes, we guide our children towards right principles, ethics and moral values. We offer our students a stress-free learning environment which encourages creativity and critical thinking.

We strongly believe that the important thing is not to stop questioning. Hence, the purpose of the education received by our children is to replace an empty mind with an open one. Our School motivates its teachers to provide an atmosphere for discovery, where students are encouraged to be creative and curious, instead of routinely loading the children with academic burden.

The team of Bhavani School aspires to create an incredible place for students from diverse backgrounds to grow educationally, get involved and have a meaningful school experience. I firmly believe that an educational institute is not just about bricks, mortar and concrete, but about building character, enriching minds and enriching experiences that last a lifetime. Life is not a set of instructions but is a series of experience and learning processes. Education is no exception.

Our former President APJ Abdul Kalam asked, "Can we make an education system which will retain the smiles on the faces of our children throughout their education?" We are committed to meet this challenge.

## SUPPORTING THE CONSTRUCTION OF KNOWLEDGE

# Space and embodiment in informal learning

### HOW DOES THE SCHOOL LIBRARY SUPPORT OUR STUDENTS?

#### THINK

Display curiosity. Seek answers. Gain Knowledge. Ask questions. The school librarian can provide you strategies to help your child discover new ideas .

#### CREATE

The school librarian can demonstrate safe, age-appropriate strategies that encourage your child to create knowledge as a writer, artist, storyteller, and digital citizen.

#### SHARE

Share knowledge. Participate with other students gaining knowledge. The school library is a great place for your child to share ideas and thoughts with their peers and the global community.

#### GROW

Aspire to grow as a student. Increase literacy. The school library helps with books and resources to stretch a student's boundaries and help them grow as a learner.

Our motive when it comes to learning for the students is something which we seek to involve in their day to day activities.

Rather than following the traditional model , we intend to implement "Conceptual Learning" which involves students engaged in quality learning experiences based around key concepts and central ideas rather than using the more traditional method of focusing on learning on topics.

Many teachers have documented the benefits of daily practice in leading, participating, listening, and cooperating. They find that these practices help them consciously set the tone and expectations for a constructive classroom community.

EARLY STAGE ONE - students develop a PERSONAL perspective, thinking about me and my relationship with the immediate world around me.

STAGE ONE- students develop a LOCAL perspective, thinking about their families and communities and their relationships with each other.

STAGE TWO- students develop a NATIONAL perspective, thinking about their relationship with INDIA and the country and culture they live in.

STAGE THREE- students develop a GLOBAL perspective, thinking about global relationships, connections and issues from an Indian viewpoint.

## STEM EDUCATION

Our Robotics, Skill, and Science Labs have been activated integrating STEM Education in school through different interactive ways. It explains to the students how they can solve real-life problems by using the knowledge which they acquire from STEM learning.

It teaches various types of useful innovative skills to students such as computational thinking, problem-solving skills, Creative thinking, logical reasoning, better decision making, and good observation power.

With the help of STEM-related do-it-yourself activities the students will encourage them to learn more and more and spend most of their time learning and experimenting.

The students understand with ease the subject which they feel is difficult to understand through theoretical means.

With the help of learning by doing the student will develop a solid foundation about the concept and will be able to implement it in solving real-life problems. With the help of STEM learning the students undergo a transformation from an active user of technology to a passive user of the technology

Kids love to interact with gadgets like smartphones, tablets, etc. with the help of STEM learning they will understand the inner workings of these devices too. This form of education creates a very good learning environment that promotes a hands-on learning experience and helps to evolve the mindset of the student.

# C L A S S R O O M

## HALF YEARLY EXAMS CONCEPT BASED PRACTICE

Rather than going with the traditional way of conducting lengthy exams, we as Bhavani School understand the pressure it intakes upon a student to appear the paper in the fraction of time without a break.

To bring a change to this approach, we conducted our exams in 2 parts where the first part was conducted post breakfast; then students got a 15 min break, to refresh themselves, get snacks and move ahead with the second part of the exam.

This approach of ours significantly showed a difference in the answer writing ability of the student and to perform better in their exams.

Students reflected good improvement in their papers as well as it helped in reducing their exam fear.

# DINING HALL

You don't need us to tell you that good food is important. And when you're busy with school and your extracurricular activities, the last thing you will want to think about is "What's for lunch?" Don't worry - we have that covered with a nutritious, balanced diet.

Here at Bhavani School, the habit of healthy eating is of paramount importance. The kitchen serves Breakfast, Snacks, and Lunch, every day to the students. Food is prepared under strict hygiene conditions and supervised by an experienced Kitchen Manager. The kitchen is equipped with the latest technology, including a deep freezer, water cooler, and other cooking gadgets. The campus also has its own water purification plant.

To inculcate clean eating habits among students, we provide them with aprons so they understand the importance of hygiene, not wasting food, and how to respect the space around them when they are eating in a group.

The focus on healthy food and drink is part of our philosophy that education is not just about learning facts and figures. Attention to physical wellbeing, conscious choices on personal care, and a balanced diet are just as important.

# Pools at school: an ideal educational space to train and promote the values of sport.

Water activities, especially for the youngest of children, provide the opportunity to learn life skills and healthy habits

Water activities have a positive impact on the physical and emotional well-being of children of all ages.

## Sport and competition training

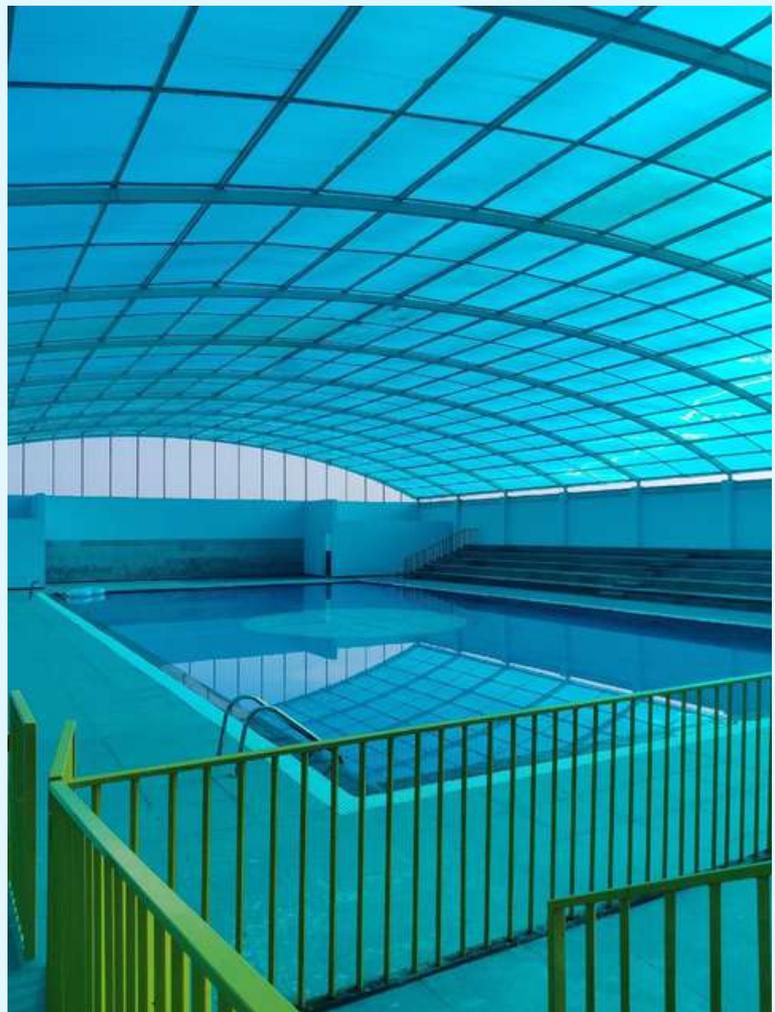

Swimming lessons in schools are a great way to introduce children to water sports at an early age. Starting early encourages excellence, allowing them to reach the performance level they need for future competitions.

## Healthy habits

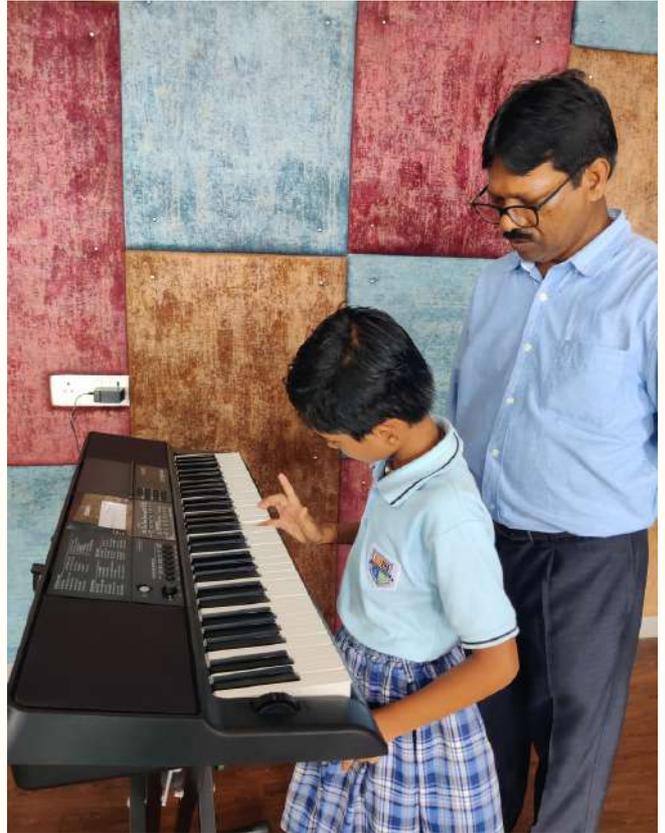

It's one of the few activities that you can do at any age and with any ability. It provides a full-body workout that develops good muscle structure, improves breathing capacity, cardiovascular fitness, and blood circulation, and prevents injuries and poor posture.

## Safety

Drowning is one of the most common causes of accidental death in children. All children should have the opportunity to learn how to swim and be taught how to stay safe in and around water.

# MUSIC CLASSES

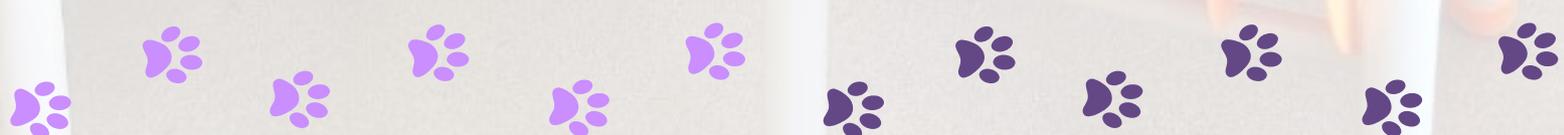

# BHAVANI'S LITTLE FOOTPRINTS

Importance of preschool education is that in preschool, children don't just explore their environment but also develop physical coordination skills. Activities involving running, climbing, beading, art, and craft help develop hand-eye coordination, and fine and gross motor skills.

As rightly said by Albert Einstein 'Play is the highest form of research' proves right especially with this age group because they learn to find answers to their numerous questions through exploration, experimentation and conversations during guided and scaffolded play in purposeful play environments created by adults. These experiences nurture natural curiosity in young minds and they are always eager to inquire.

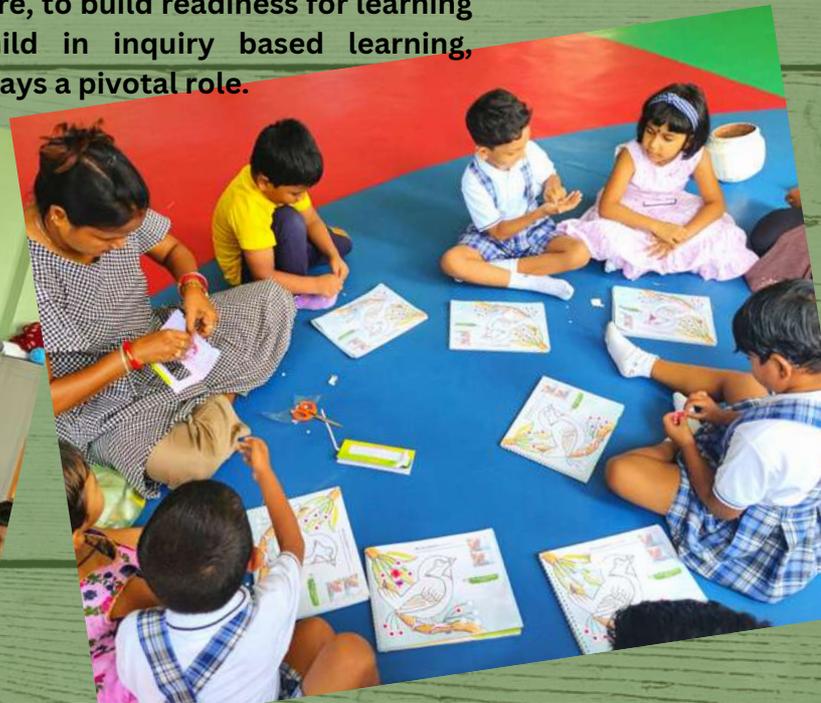

Symbolic thought is another important cognitive development that happens during the pre-school years. Symbolic thought is the ability to mentally or symbolically represent concrete objects, actions, and events. Examples would pretend play or make-believe play activities, drawing or representing things, and speaking about objects.

A child who experiences the joy of learning, of discovery and of successfully completing age appropriate tasks at a young age will be more likely to enjoy school later in life and do better academically as well.

A quality early childhood education provides children with cognitive, behavioral and social skills they cannot learn at home. Therefore, to build readiness for learning and immerse the child in inquiry based learning, preschool education plays a pivotal role.

Different tailored activities understanding each child's need is what we do here at Bhavani School in a way that it helps in a child's emotional, social and personal growth and development. When a 3-year-old is able to spend time with adults other than parents they learn to build trusting relationships with adults.

Exposure to rich language through role plays, read aloud sessions and stories helps to enhance the child's vocabulary, thereby promoting language skills.

# QUIZ!

Our journey so far has been nothing less than amazing and we are ever so far grateful to all the parents who supported us at the onset of this journey.

Up until now, we have celebrated quite a few events and competitions with our enthralling and enthusiastic students.

Our CCA competitions have been conducted and will be conducted in such a setup so that the student gets prepared for coming to Inter School and Intra School competitions with full zeal and confidence.

We have until now completed with :

- Handwriting competition
- Dance Competition
- Mental Maths Quiz Competition
- Sports
- Poetry Competition
- Debate, Spelling Bee, and the Olympiads are coming forward in the given months.

# Earth Day Celebrations

You don't have to be a Superman, be Captain Planet!!  
Let's save the mother earth together.

For the past 40 years, Earth Day has been celebrated around the world to call attention to some of our most pressing environmental and social problems, including climate change, biodiversity loss, and dwindling natural resources.

The day started with a beautiful message where students were reminded of 5 actions towards safe earth. The whole school, whether it was the students, support staff, teachers, guards, admin staff or helpers took part in this initiative.

Each one of them took a pledge to save Mother Earth by doing simple doable actions. Our continuing effort in our daily life will make this beautiful planet thrive.

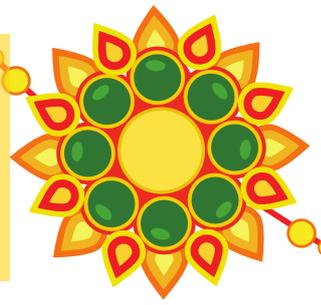

This is how students at Bhavani School celebrated Earth day at school in a fun way with a lot of learning .

*Standing by the motto "Everyday is Earth Day".*

# रक्षाबंधन

The Pre-primary kids of Bhavani School celebrated Raksha Bandhan with full zeal and endeavor that one associate with this auspicious festival. The main objective behind celebrating 'Raksha Bandhan' was to make the children aware of the virtuous bond of love between a brother and a sister which is one of the deepest and noblest of all human emotions.

The tiny tots enthusiastically participated in tying rakhi on the wrist of their brothers and performed thali decoration, rakhi making, and coloring activities. The narrators, dancers, and singers, performed to the best of their abilities. The vibrant, colors and innocent smiles brightened the ambiance and lifted the spirit.

# इशरी क्रीशुन जन्मशतमी

Sweeter than honey, tastier than curd, pleasanter indeed than any happiness and joy are the company, the power of Krishna's name. The birthday of Lord Krishna was celebrated with great devotion and enthusiasm, on this Janmashtami day, in our school with these happy faces.

Janmashtami festival was celebrated with great zeal and pomp by the tiny tots of Pre-Primary here at our school. The children also marked the occasion by singing and dancing with great joy. While this religious importance is not lost, this day signifies a lot more to modern India, it signifies excitement, euphoria, and a joyous spirit of enthrallment. To celebrate the extraordinary bond between children and the Almighty,

Our School took the opportunity to both jubilate and learn with the young minds.

# CCA

# COMPETITIONS

A core component of holistic education is the Extra-Curricular and Co-Curricular activities that shape the development of students. They are instrumental in honing the talents and developing social skills, critical thinking and teamwork.

Our school has an array of ECA and CCA activities for the benefit of our students. It is mandatory for our students to participate in at least one activity under both categories. To instill a sense of belonging, camaraderie, and brotherhood among students, many of these activities is held by grouping students into four Houses that encourage healthy competition, a hunger for winning, and pride in accomplishments.

The 100 percent participation is a multi-pronged strategy for the development of intellectual, cognitive and creative skills in each child. It unearths the co-scholastic talent of the child, inculcates confidence in the young children to perform on stage and infuses competitive spirit in each and every child.

The various competitions held until now where the students have showcased their talent are Handwriting Competition , Poetry Competition , Dance Competitions and going forward will be participating in Quiz , Art , Debate competitions as well.

# TRIVIA TIME

The month of August was amazingly well spent with a lot of brainstorming and creativity happening across.

Mental Maths Quiz was introduced to improve numeric skills and remove Maths phobia among our students and since then there has been no going back.

Some of the highly important objectives we were trying to inculcate were:

- Making mathematics learning enjoyable, engaging, and full of fun.
- Strengthening the foundation for learning mathematical concepts
- Shedding the usual fear of mathematics
- Improving the results- both in CBSE exams and school exams
- Developing better reasoning and logical skills.
- Enhancing speed and accuracy in students and thereby competency and confidence to handle high stake competitive exams like NTSE, JSTS, and IIT- JEE, etc.
- Making learning joyful.

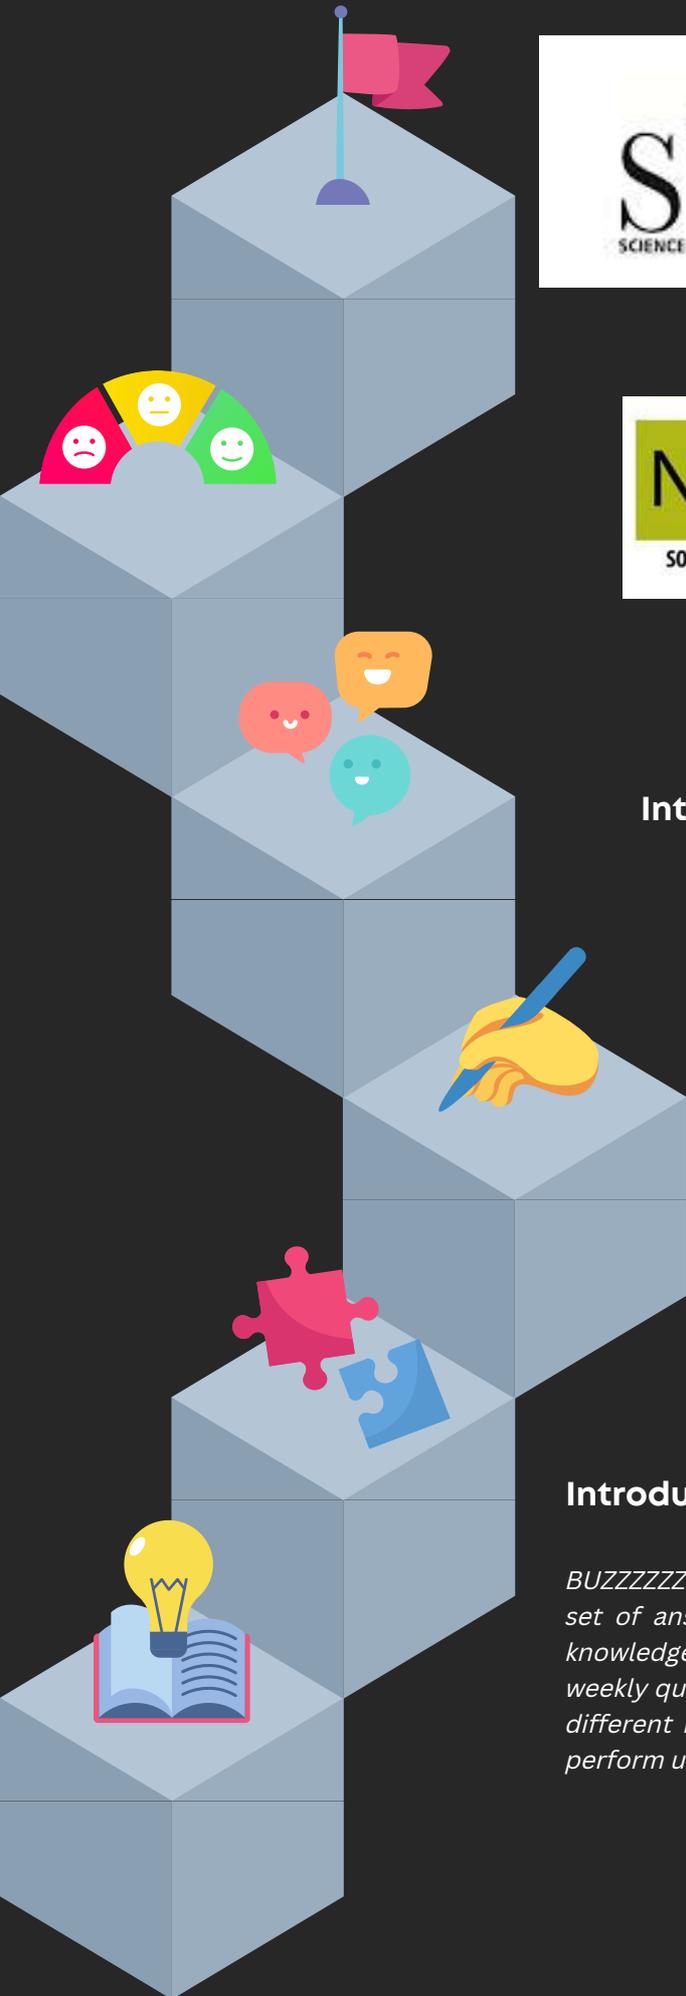

# Learning Spaces

# Upcoming Activities

## Introducing Olympiads

*The introduction of Olympiads at Bhavani aims to assist students in widening their academic horizon beyond the school books and prepare to excel in today's highly competitive environment.*

## Introducing Cambridge Early Years

*Cambridge Early Years programme is the start of an exciting educational journey that helps learners aged 3 to 6 develop the knowledge, understanding and skills they need to make the best possible start in life.*

*It gives centres everything they need to deliver a quality early years education: a holistic and balanced curriculum, engaging classroom resources, assessment approaches to measure learners' progress, and professional development opportunities. Teaching and learning is play-based and child-centred, and focuses on building learners' skills and confidence in key developmental areas.*

## Introducing Weekly Quizzes

*BUZZZZZZ.... goes the buzzer and our children are ready with the next set of answer. This is how we plan to inculcate the confidence, knowledge, skills, acumen of a student at Bhavani School. There are weekly quizzes being conducted every week on a specific subject with different kind of questions, time slots where the students learn to perform under pressure with their knowledge getting boosted.*

# Calendar for The upcoming months

## OCTOBER

- 
- 15TH PATRIOTIC SONG COMPETITION
- 
- 21ST PTM - (ALL CLASSES)
- 
- 22ND DIYA MAKING/DIWALI CARD COMPETITION
- 
- 24TH DIWALI AND KALIPUJA
- 

## NOVEMBER

- 
- 5TH SPELLING BEE COMPETITION
- 
- 14TH CHILDREN'S DAY
- 
- 19TH PTM - (ALL CLASSES)
- 

## DECEMBER

- 
- 10TH PTM - (ALL CLASSES)
- 
- 19TH PERIODIC ASSESSMENT 2 STARTS
